

ADESANYA IGBOKOYI

PRODUCT DESIGNER | UI/UX | DESIGN SYSTEMS

Lagos, Nigeria | +234 815 556 7284 | koyiadesanya@gmail.com | [linkedin.com/in/adehsanya](https://www.linkedin.com/in/adehsanya) | layers.to/sanya

PROFILE

Product designer creating clear web and mobile experiences for complex products across AI, legal technology, aviation, healthcare, ecommerce, sustainability, and government services. Strong in user flows, data-heavy dashboards, responsive interfaces, scalable design systems, and implementation-ready Figma design.

EXPERIENCE

Product Designer | Baked Studio

August 2025 - August 2026 | Remote · Vancouver, Canada

- Designed web and mobile products for clients across AI, legal technology, aviation, healthcare, ecommerce, and government services.
- Designed Ares Legal AI workflows for AI-assisted casework and document preparation, and contributed to Radar's data-heavy aircraft portfolio and maintenance experiences.
- Expanded Endear's design system across component structure, accessibility, interaction states, dark mode, and developer handoff.
- Created OneTwenty's mobile UI and design system with reusable components, visual foundations, and consistent responsive patterns.
- Redesigned Verwaltungssprung dashboards, application flows, subscriptions, document submission, family profiles, and AI-assisted chat while partnering closely with clients and engineers.

Product Designer | DitchCarbon

July 2025 - September 2025 | Remote · London, United Kingdom

- Created DitchCarbon's first unified Figma design system, rebuilding existing interfaces with reusable components and consistent patterns.
- Designed supplier onboarding and organisation-claiming flows covering company search, document uploads, profile editing, and team-access requests.
- Designed the Organisation Maturity experience and improved dashboards, data snapshots, exports, supplier profiles, modals, and workflow states with product and engineering.

Product Designer | Dellioo

April 2025 - June 2025 | Lagos, Nigeria

- Designed interfaces, wireframes, and interactive prototypes for route optimisation, analytics, and logistics operations.
- Improved order-management workflows including pickup and delivery details, status tracking, activity logs, and key actions.
- Redesigned the public landing page and created reusable dashboard components while supporting engineering implementation.

Freelance Product Designer | Independent

October 2022 - Present | Remote

- Collaborate with founders and product teams to clarify product ideas, prototype workflows, and design usable web and mobile interfaces.

EDUCATION

Bachelor of Applied Science, Biochemistry and Nutrition

Fountain University, Osogbo | September 2017 - September 2021

SKILLS

Product design: Product strategy, interaction design, information architecture, user flows, wireframing, prototyping, responsive UI, dashboards, usability testing, accessibility, developer handoff

Design systems: Design tokens, variables, reusable components, component states, pattern libraries, documentation, accessibility, Storybook collaboration

Tools: Figma, FigJam, Storybook, Notion, Jira, Slack, Loom
